 Hyderabad, Telangana, India

PROFESSIONAL SUMMARY

- Full Stack AI Engineer with hands-on experience building and deploying AI-powered applications using FastAPI, React, and LangChain. Skilled in designing RAG-based systems, integrating LLMs into production workflows, and developing scalable backend APIs. Strong foundation in machine learning, system design, and end-to-end application development.

EDUCATION

- **Institute of Aeronautical Engineering** Hyderabad, Telangana
Bachelor of Technology - Electronics & Communication Engineering; CGPA: 6.95 Nov 2022 - Apr 2026

SKILLS SUMMARY

- **Languages:** Python, Java, JavaScript, SQL, C
- **Frontend:** ReactJS, Tailwind, NextJS
- **Backend:** FastAPI, Flask, RestAPIs, Microservices
- **AI/ML:** TensorFlow, Keras, Neural Networks, Pandas, NumPy
- **LLMs & GenAI:** LangChain, RAG, Prompt Engineering, Embeddings
- **cloud & Deployment:** AWS(EC2, S3), Docker, Docker Compose, Git, GitHub Actions
- **Core CS:** Data Structures & Algorithms

EXPERIENCE

- **Pinnacle Labs** Virtual
Web Development Intern May - Nov 2024
 - Developed backend services for a toy exchange platform using FastAPI and MongoDB, improving API performance and exchange management efficiency by 30
 - Built and integrated smart automation features into a toy exchange platform, enabling personalized toy recommendations and efficient exchange management workflows.
 - Containerized the toy exchange application using Docker to enable consistent deployment and streamlined development workflows.
- **Edu Skills** Virtual
AIML Intern Feb - Apr 2025

PROJECTS

- **Digital Security Process Over SDN-Based Cloud Native 5G Core Networks** — May 2025
 - Designed a digital security for SDN-based cloud-native 5G networks with secure and scalable architecture.
 - Built a React-based UI integrating REST APIs for real-time updates and secure user interactions.
 - Implemented an efficient retrieval system with optimized APIs for faster and context-aware data access.
- **Smart HealthCare System Application** — *React, FastAPI, MongoDB, TensorFlow, Docker* Aug 2024
 - Developed an AI-based healthcare prediction system with high accuracy.
 - Designed data processing workflows for healthcare analytics and prediction systems.
 - Improved healthcare prediction accuracy using patient data insights and risk indicators.
- **Digital Notice Board Using Arduino and Bluetooth HC05** — *Arduino IDE, React, Node.js, MongoDB* Nov 2024
 - Built a digital notice board system for real-time message display and efficient communication.
 - Integrated Bluetooth-based communication to enable real-time message updates and device control.

CODING PLATFORMS

- 600+ Problems Solved, Badges and 90k Rank in SQL & Python - LeetCode

CERTIFICATIONS

- Data Science Using Python - NSIC
- Artificial Intelligence And Machine Learning - Eduskills
- Data Analytics And Visualization - Accenture, Forage
- Math Work Training - MatLab
- Arduino, SDN-Based 5G Network Publication - IJSREM
